Gelenk-Aktiv 20

Special features of Gelenk-Aktiv 20:

- ✓ Extensive nutrient variety from the green-lipped New Zealand mussel (20%) to support the musculoskeletal system
- ✓ Also contains rampion
- ✓ The added trace elements manganese and iron which are organically bound can play a role in collagen production
- ✓ Also contains Vitamin E and C and selenium which serve as a natural cell protection
- ✓ The amino acids lysine and methionine are protein elements which can provide a diet-related support of the musculoskeletal system
- ✓ The existing B-Vitamin complex ensures an optimal intake of the contained vital substances

Proven combination of nutrients with green-lipped New Zealand mussel for more mobility

Ideally suited:

- ✓ As a diet-related support for horses with problems with their tendons, ligaments, joints and cartilage
- ✓ As a therapy for a supportive nutrient supply for joints, tendons, ligaments and cartilage
- ✓ For old horses to support mobility

Joints, tendons and ligaments – Why is the green-lipped New Zealand mussel used for problems with the musculoskeletal system? The green-lipped New Zealand mussel contains a high percentage of glycosaminoglycan which belongs to one of the most important components of the connective tissue in the whole musculoskeletal system (tendons, ligaments, joints and cartilage). Additionally the mussel contains polyunsaturated fatty acids which can be used as components (e.g. development of connective tissue) in the body. These unsaturated fatty acids cannot be produced by the horse's organism and therefore have to be added in the feed.

Gelenk-Aktiv 20 contains 20% green-lipped New Zealand mussel (glycosaminoglycan) of highest quality which is enriched with the "joint-nutrients" chondroitin sulfate, glucosamine and MSM. Additionally Gelenk-Aktiv 20 contains approved herbs such as oak bark and willow bark combined with special micro-nutrients for more mobility. The proven recipe therefore supplies

the body with important nutrients to support the entire musculoskeletal system. Gelenk-Aktiv 20 is also enriched with rampion.

Feeding recommendations:

Large horses: 30 g per day

Ponys and small horses: 15 to 20 g per day

Contains fish meal – do not feed to ruminants

Gelenk-Aktiv 20

Composition

Green-lipped New Zealand mussel, wheat bran, dextrose, linseed expeller meal, rampion, brewer's yeast, whey powder, vegetable fat (palm), glucosamine, methylsulfonylmethan (MSM), chondroitin sulfate, fatty acids, horse tail, rose hips, oak bark, cinnamon bark, willow bark,

Analytical components

Crude protein	22,9 %	Lysin	4,2 %
Crude oil & fat	7,4 %	Methionin	8,1 %
Crude fibre	1,1 %		
Crude ash	5,3 %		

Additives per kg

Vitamin A	250.000 I.E.
Vitamin D3	20.000 I.E.
Vitamin E as alpha-tocopherol-acetate	10.000 mg
Vitamin C as L(+)-ascorbic acid – pure substance	5.000 mg
Vitamin B1 as thiamine mononitrate – pure substance	1.500 mg
Vitamin B2 as riboflavin – pure substance	2.500 mg
Vitamin B6 as pyridoxine-hydrochloride – pure substance	2.000 mg
Vitamin B12	5.000 µg
Nicotinic acid as nicotinamide – pure substance	5.000 mg
Pantothenic acid as Ca-D-pantothenate – pure substance	2.000 mg
Folic acid as folic acid – pure substance	300 mg
Biotin as biotin-preparation	100.000 µg
Choline chloride as choline chloride – pure substance	270 mg
Iron as glycine iron chelate, hydrate	500 mg
Manganese as glycine manganese chelate, hydrate	2.000 mg
Zinc as glycine zinc chelate, hydrate	3.000 mg
Copper as glycine copper chelate, hydrate	300 mg
Iodine as calcium iodate	10 mg
Selenium as sodium selenite	10 mg
Cobalt as coated cobalt-(II)-carbonate-granulate	5 mg
Kieselguhr	25.000 mg
Bentonite	39.600 mg

Ideally suited:

- ✓ As a diet-related support for horses with problems with their tendons, ligaments, joints and cartilage
- ✓ As a therapy for a supportive nutrient supply for joints, tendons, ligaments and cartilage
- ✓ For old horses to support mobility
