Hay Cobs

Special features of Hay-Cobs:

- ✓ Meadow hay from Bavaria, freshly harvested, dried and carefully processed
- ✓ Rich in fibre
- ✓ Low in starch and sugar
- ✓ An ideal roughage substitute as an improvement of the roughage supply
- ✓ A natural product – without extra additives, molasses and grains
- ✓ Free of dust and mold
- ✓ No added aromas, essential oils or other additives

Ideally suited:

- ✓ As a high quality roughage addition or substitute when the hay supply is low
- ✓ To improve hay that is low in nutrients
- ✓ As a constant high quality improvement of the roughage supply
- ✓ As a substitute for hay for older horses or horses with dental problems
- ✓ Ideally suited as crib feed for horses with wheat intolerance
- ✓ Ideally suited as crib feed for horses that are prone to gain weight
- ✓ As a substitute for concentrate feed

Hay cobs made of Bavarian meadow hay as an improvement of the roughage supply

Unfortunately the offer of high-quality hay is limited. In this case hay-cobs are an ideal alternative to ensure your horse's roughage supply. LEXA Hay Cobs come straight from Bavarian meadows where they are dried and processed. As a pure source which is full of nutrients. LEXA Hay Cobs play an important role in improving the roughage supply. LEXA Hay Cobs have a higher amount of nutrients than normal roughage does and therefore encourages the horse's wellbeing in a natural way. Hay-Cobs have proven their worth in many ways. They are an ideal substitute for horses with problems with the airways, because they are free of dust and mould. During a low supply of roughage one can fill the deficit reliably. When harvested late LEXA Hay Cobs can improve the basic feed with valuable nutrients. Old horses or horses with dental problems can profit from the nutrient density and the high digestibility. LEXA Hay Cobs are a high-quality natural product with absolutely no

added additives, grains, molasses and aromas.

Feeding recommendations:

1 kg LEXA Hay Cobs replace about 1 kg hay
Suitable in individual amounts as crib feed.
Please soak the Hay-Cobs in a large amount of water for up to 30 minutes.
