

LEXA[®] Horse Feed

for the
love
of horses

Kwik Beet

Special features of Kwik Beet:

- ✓ Low in sugar and starch
- ✓ Rich in easily digestible pectin
- ✓ Ideal as crib feed for horses with problems with their metabolism, sensitive hoofs and skin and wheat intolerance
- ✓ No extra additives, molasses or grains
- ✓ No extra aromas, essential oils or other additives

Molasses-free beet pulp as an ideal crib feed for horses with sensitive metabolisms

Ideally suited:

- ✓ As crib feed for horses with problems with the sugar metabolism, hoofs, skin or wheat intolerances
- ✓ As an improvement of feed for senior horses
- ✓ For horses with dental problems
- ✓ For horses prone to gaining weight

Kwik Beet is molasses-free beet pulp that is produced with an especially gentle cooking process and therefore only needs around 10 minutes soaking time until it can be fed.

Due to its low amount of sugar and absolutely no wheat it is ideally suitable as crib feed for horses with sensitivities in the sugar metabolism, the hoofs, skin and wheat intolerances. Due to the high amount of easily digestible pectin and the slow release of energy Kwik Beet is a very tasty and light alternative for the regular crib feed.

Feeding recommendations:

100 – 200g per 100kg bodyweight
