Mobi-Akut

Special features of *Mobi-Akut*:

- ✓ Ideal as a specific nutrient supplement for acute problems of the joints, cartilage, tendons and ligaments
- ✓ A specifically designed combination of highly dosed MSM (methylsulfonylmethane), hyaluronic acid, glucosamine and chondroitin sulfate
- ✓ Enriched with incense, antioxidant vitamins and trace elements for a quick effect

A highly effective combination of nutrients to support acute problems of the musculoskeletal system

Ideally suited:

- ✓ As a supplement for acute problems of joints, cartilage, ligaments and/or tendons

LEXA Mobi-Akut contains a combination of highly dosed nutrients for joints, cartilage, tendons and ligaments that has proven to be a valuable diet-related support – especially during phases of acute problems. The wide range of nutrients consists of joint- and cartilage nutrients such as MSM (methylsulfonylmethane), glucosamine, chondroitin sulfate and hyaluronic acid. Mobi-Akut provides Vitamin E and selenium which function as an effective antioxidant that supports the antioxidant regeneration mechanisms. Additionally zinc and manganese are important co-factors of the biosynthesis of proteoglykane (joint cartilage components) and have proven to optimize the above mentioned components. LEXA Mobi-Akut also contains incense which – over decades – has been said to have a supportive effect on joint problems. Therefore the different components of LEXA Mobi-Akut show a reliable diet-related support for the entire musculoskeletal

system.

Please note the national and international doping regulations.

According to the FN (ADMR January 2013) this product has a waiting period of 2 days.

Feeding recommendations:

Large horses:

50 g daily

Ponys and small horses:

20 – 40 g daily
