of horses

## Vitalmix Iceland

### Special features of Vitalmix Iceland:

- ✓ For Icelandic ponies and other special breeds
- ✓ With a moderate level of energy
- ✓ Well-balanced supply of minerals, vitamins and trace elements
- ✓ With brewer's yeast, kieselguhr, linseed oil and bentonites
- ✓ With organic zinc, copper and manganese

### High quality muesli especially adapted to the supply of nutrients and vital substances for Icelandic ponies and other special breeds

#### Ideally suited:

- ✓ *For Icelandic ponies and other special breeds*
- ✓ *Horses and ponies with low work-loads*

Special horse breeds like Icelandic ponies or horses have a high demand for a well-balanced diet. Often these breeds are prone to skin- or coat problems which are often closely linked to the diet. These breeds are often light-feeders and only need small amount of concentrates. This means that these small amounts have to be highly efficient and additionally have to offer a good supply of highly available minerals, vitamins and trace elements.

For decades Vitalmix Iceland has been a well-tried special muesli which covers these high dietary demands. It reliably covers the energy- and protein supply with 20 % maize flakes and 30 % barley flakes and also a wholesome pellet adapted to the needs of special breeds.

Lucerne, which is full of valuable amino acids, supports the musculoskeletal system and the entire vitality. Additionally this valuable special muesli is enriched with natural vital substances like kieselguhr, brewer's yeast and linseed oil to strengthen the skin and coat. Added bentonite has a positive effect on the digestion, metabolism and detoxification because these

natural clay minerals bind and extinguish heavy metals. For an optimal supply of the important trace elements manganese, zinc and copper Vitalmix Iceland contains highly available organic trace elements. With 2,5% the amount of molasses in Vitalmix Iceland is kept very low to relieve the metabolism. We generally forego the use of essential oils in our mueslis because these can cause severe problems for the liver.

Vitalmix Iceland can be fed as a sole concentrate feed or in combination with oats or hydrothermally treated wheat flakes. The recommended amount of feed is 400 g per 100kg body weight daily.

## Vitalmix Iceland

### Composition

Barley (hydrothermally treated and ground), Maize (hydrothermally treated and ground), Lucerne meal, oat fibre, dried molasses, wheat bran, dried molasses, sodium chloride, sugar beet molasses, rapeseed oil, mono calcium phosphate, brewer's yeast, calcareous marine algae, calcium carbonate, sea weed meal, linseed oil

### Analytical components

Crude protein	11,1 %	Potassium	1,1 %
Crude oil and fat	4,1 %	Lysine	0,4 %
Crude fibre	9,0 %	Methionine	0,1 %
Crude ash	10,1 %	Threonine	0,3 %
Calcium	1,1 %	Cystine	0,1 %
Phosphorus	0,6 %	Energy (ME)	10,0 MJ/kg
Magnesium	0,2 %	Digestable protein	8,3 %
Sodium	1,1 %		

### Additives per kg

Vitamin A	25.000 I.E.
Vitamin D3	2.000 I.E.
Vitamin E as alpha-tocopherol-acetate	250 mg
Vitamin C as L(+)-ascorbic acid – pure substance	50 mg
Vitamin B1 as thiamine mononitrate – pure substance	16 mg
Vitamin B2 as riboflavin – pure substance	40 mg
Vitamin B6 as pyridoxine-hydrochloride – pure substance	15 mg
Vitamin B12	300 µg
Nicotinic acid as nicotinamide – pure substance	124 mg
Pantothenic acid as Ca-D-pantothenate – pure substance	51 mg
Folic acid as folic acid – pure substance	5 mg
Biotin as biotin-preparation	500 µg
Choline chloride as choline chloride – pure substance	473 mg
Betaine as betaine-preparation	50 mg
Iron as iron-(II)-sulphate, mono hydrate	76 mg
Manganese as manganese oxide	61 mg
Manganese as glycine manganese chelate, hydrate	<b>30 mg</b>
Zinc as zinc oxide	229 mg
Zinc as glycine zinc chelate, hydrate	<b>60 mg</b>
Zinc as zinc sulphate, mono hydrate	20 mg
Copper as copper-(II)-sulphate, penta-hydrate	51 mg
Copper as glycine copper chelate, hydrate	<b>12 mg</b>
Iodine as calcium iodate	1,0 mg
Selenium as sodium selenite	0,6 mg
Cobalt as coated cobalt-(II)-carbonate-granulate	0,6 mg
Kieselguhr	5.000 mg
Bentonite	4.500 mg

### Ideally suited:

- ✓ For Icelandic ponies and other special breeds
- ✓ Horses and ponies with low work-loads
