## Vitalmix Sport

### Special features of Vitalmix Sport:

- ✓ High energy level
- ✓ High amount of pure hydrothermally treated maize- and barley flakes
- ✓ Highly digestible to relieve the digestive system
- ✓ With a well-balanced supply of minerals, vitamins and trace elements
- ✓ Ideal as a sole concentrate or in combination with oats

### Oat-free and wholesome premium-quality muesli which is rich in energy and suitable for sport horses

#### Ideally suited:

- ✓ For sport horses in all performance levels
- ✓ In combination with other products individually adapted to the needs of the sport horse

In training and during competitions sport horses have to be motivated and vital. For these high demands it is essential to deliver highly digestible energy sources via the feed. Hereby the quick supply of muscle energy which provides the horse with activity is especially important. Additionally feed components that provide the highest amount of energy in small amounts of feed have to be included to relieve the horse's sensitive digestive system. Therefore in Vitalmix Sport we have always relied on grain flakes in the highest- and food quality. This high quality standard and the well-performing recipe has made Vitalmix Sport popular for decades.

45% hydrothermally treated maize flakes, 29 % hydrothermally treated barley flakes in pure quality are rounded off by adding a pellet of vital substances which ensures a supply of valuable protein and pectin which supports the digestion. Additionally the pellet contains a well-balanced supply of minerals, vitamins (500 mg vitamin E and 3 g magnesium for a strong muscular system and nerves) and trace elements. The regular feeding of Vitalmix Sport leads to motivated horses and an optimal condition. Vitalmix Sport can be fed as a sole concentrate and can also be ideally combined with oats. Therefore an addition of oats can be individually added according to the temperament and performance of the horse.

What has to be taken into account for high-performance horses:

Vitalmix Sport is a well-tried wholesome muesli for sport horses. The strain on the heart- and skeletal muscular system increases according to the performance level. With these demands the needs for vitamin E and essential amino acids (substances which support an intact heart- and skeletal muscular system) increases. When the highest performance is demanded we recommend adding our products Super-E 100 Selen and Amino Muskelaufbau.

#### **Feeding recommendations:**

According to work load up to 600 g per 100 kg body-weight daily.

## Vitalmix Sport

### Composition

Maize flakes (hydrothermally treated and ground), barley flakes (hydrothermally treated and ground), Lucerne meal, wheat bran, dried molasses, calcium carbonate, sugar beet molasses, rapeseed oil, calcareous marine algae, mono calcium phosphate, magnesium oxide, sea weed meal

### Analytical components

Crude protein	10,0 %	Potassium	0,7 %
Crude oil and fat	4,2 %	Lysine	0,3 %
Crude fibre	5,8 %	Methionine	0,1 %
Crude ash	7,9 %	Threonine	0,3 %
Calcium	1,1 %	Energy (ME)	11,1 MJ/kg
Phosphorus	0,4 %	Digestible energy	7,5 %
<b>Magnesium</b>	<b>0,3 %</b>		
Sodium	0,8 %		

### Additives per kg

Vitamin A	25.000 I.E.
Vitamin D3	2.000 I.E.
Vitamin E as alpha-tocopherol-acetate	<b>500 mg</b>
Vitamin C as L(+)-ascorbic acid – pure substance	50 mg
Vitamin B1 as thiamine mononitrate – pure substance	15 mg
Vitamin B2 as riboflavin – pure substance	40 mg
Vitamin B6 as pyridoxine-hydrochloride – pure	15 mg
Vitamin B12	300 µg
Nicotinic acid as nicotinamide – pure substance	120 mg
Pantothenic acid as Ca-D-pantothenate – pure substance	50 mg
Folic acid as folic acid – pure substance	4 mg
Biotin as biotin-preparation	375 µg
Choline chloride as choline chloride – pure substance	300 mg
Betaine as betain-preparation	38 mg
Iron as iron-(II)-sulphate, mono hydrate	58 mg
Manganese as manganese oxide	61 mg
Zinc as zinc oxide	342 mg
Copper als copper-(II)-sulphate, penta-hydrate	63 mg
Iodine as calcium iodate	1,1 mg
Selenium as sodium selenite	0,6 mg
Cobalt as coated cobalt-(II)-carbonate-granulate	0,6 mg
