love
of horses

Weide-Mineral-Cobs

Special features of Weide-Mineral-Cobs:

- ✓ In the practical size of treats
- ✓ A supply of minerals, vitamins and trace elements especially adapted to every-day needs
- ✓ Tasty and rich in vital substances
- ✓ For horses kept in pastures without or with a low amount of concentrates
- ✓ With bio-active marine algae and organic trace elements

Mineral feed in the practical size of treats for delivers all minerals, vitamins and trace elements especially adapted to the pasture-season in the summer months

Ideally suited:

- ✓ For leisure horses that spend all day on pastures
- ✓ For horses kept in a robust environment

Weide-Mineral-Cobs were developed especially for horses kept in a robust environment or for horses that spend a lot of time on pastures.

In a practical treat-like size this mineral feed delivers all vital minerals, vitamins and trace elements and therefore reliably prevents deficiencies. Weide-Mineral-Cobs can be fed with or without concentrates.

The supply of vitamin A, D3 and E is adapted to a horse which spends all day on the pasture and hereby prevents over-doses of fat-soluble storing vitamins.

Despite the reduction of the vitamins which are contained in the grass Weide-Mineral-Cobs reliably provide vital minerals such as calcium, phosphorus and magnesium and all other trace elements.

To improve the bio-availability there is a combination of inorganic and organic zinc,

copper and manganese.

Feeding recommendations:

Daily 20 g per 100kg body weight – 1 Weide-Mineral-Cob weighs about 10g.

Large horses: 90 – 150g daily = about 9 to 15 Weide-Mineral-Cobs

Small horses and ponies: 40 to 80 g daily = about 4 to 8 Weide-Mineral-Cobs

Isi-Mineral-Cobs

Composition

Wheat bran, mono calcium phosphate, calcareous marine algae, corn gluten, sodium chloride, sugar beet molasses, Ca-Mg-carbonate, wheat germ, Lucerne meal, dried molasses, rapeseed oil, magnesium oxide, calcium carbonate, garlic

Analytical components

Calcium	7,0 %
Phosphorus	3,0 %
Magnesium	2,0 %

Sodium	3,0 %
Potassium	1,0 %

Additives per kg

Vitamin A	100.000 I.E.
Vitamin D3	10.000 I.E.
Vitamin E as alpha-tocopherol-acetate	1.000 mg
Vitamin C as L(+)-ascorbic acid – pure substance	1.000 mg
Vitamin B1 as thiamine mononitrate – pure substance	300 mg
Vitamin B2 as riboflavin – pure substance	150 mg
Vitamin B6 as pyridoxine-hydrochloride – pure	150 mg
Vitamin B12	1.200 µg
Nicotinic acid as nicotinamide – pure substance	880 mg
Pantothenic acid as Ca-D-pantothenate – pure substance	600 mg
Folic acid as folic acid – pure substance	100 mg
Biotin as biotin-preparation	10.000 µg
Choline chloride as choline chloride – pure substance	1.500 mg
Betaine as betain-preparation	1.000 mg
Iron as iron-(II)-sulphate, mono hydrate	1.180 mg
Manganese as manganese oxide	800 mg
Manganese as glycine manganese chelate, hydrate	750 mg
Zinc as zinc oxide	3.040 mg
Zinc as glycine zinc chelate, hydrate	1.500 mg
Zinc as zinc sulphate, mono-hydrate	500 mg
Copper as copper-(II)-sulphate, penta-hydrate	760 mg
Copper as glycine copper chelate, hydrate	300 mg

Iodine as calcium iodate	17 mg
Selenium as sodium selenite	12 mg
Cobalt as coated cobalt-(II)-carbonate-granulate	11 mg
